Beyond the Call

A real conversation, a bigger story.

A one-day, hands-on program that builds the listening, communication and call-handling skills behind every customer conversation — with a measurement plan built in from day one, not added afterward.

FORMAT	DESIGN	EVALUATION
1 day · 7 hours	12 objectives, 6 modules	Kirkpatrick levels 1–4

02

WHY THIS, WHY NOW

The case for this training

Soft skills on a call are not a “nice to have”. They are the difference between a transaction and a reason to stay a customer. Teams usually feel this before they can measure it — in longer handle times, repeated complaints, or a plateauing NPS.

This program exists to close a specific gap: agents know the policy, but not always a repeatable way to listen, question and de-escalate under pressure. That gap is what the six modules on page 5 are built to close.

SIGNS THIS TRAINING IS WORTH PRIORITIZING NOW

- **Customers repeat themselves, or feel unheard, on calls**
- **Complaint calls escalate more often than they resolve**
- **Call handling is inconsistent from one agent to the next**
- **NPS or CSAT has plateaued, or is trending down**
- **New hires take weeks to sound confident on a call**

$62B

lost annually to poor customer service in the U.S.

NewVoiceMedia.com

51%

of customers never return after one bad experience.

NewVoiceMedia.com

5–25×

more expensive to win a new customer than to keep one.

Salesforce.com

General industry evidence, not a claim about your team specifically — the actual training need is worth confirming against your own call data, complaint logs or NPS trend.

03

PROGRAM AT A GLANCE

One day, six modules, a full skill arc

From why customers stay, to a five-step method for every call, to handling the moment a customer is angry — with practice built into each stage, not bolted on at the end.

1	6	12	6	4	5
TRAINING DAY	**MODULES**	**OBJECTIVES**	**BLOOM LEVELS**	**KIRKPATRICK LEVELS**	**VIDEO CLIPS**
7 hours, one of them a break	built to follow one another	taken directly from the course	Remember through Create — see page 4	each with a named tool, page 9	already built into the course

04

LEARNING OBJECTIVES

What participants can do by 4pm

	OBJECTIVE — AS WRITTEN IN THE COURSE	BLOOM LEVEL*
01	List the six communication barriers covered in the training.	Remember
02	Name the three communication styles.	Remember
03	Recall the five steps of the SCORE process.	Remember
04	State the formula used to calculate Net Promoter Score (NPS).	Remember
05	Explain the difference between open and closed questions.	Understand
06	Explain the purpose of each step in the SCORE process.	Understand
07	Demonstrate the SCORE process in a customer-call role-play.	Apply
08	Replace unsuitable customer-service phrases with appropriate alternatives.	Apply
09	Identify the customer's needs, intent, and emotions in a sample conversation.	Analyze
10	Identify communication gaps in a customer-call scenario.	Analyze
11	Select the appropriate action for a customer issue: handle, escalate, or follow up.	Evaluate
12	Write a customer response that includes empathy, positive language, and a clear next step.	Create

Remember	Understand	Apply	Analyze	Evaluate	Create

*The objective wording is the course's own. The Bloom classification is our reading of it, to show the day climbs from recall to original output — not a label the course applies itself.

05 THE SIX MODULES

Six modules that build on each other

01

The Customer Experience

Why customers stay, why they leave, and the net promoter score

02

Mindset & Attitude

The cultural iceberg, and what we can and can't control

03

Communication Skills

The communication process, styles, barriers and tone of voice

04

The SCORE Method

A five-step method for listening, questioning and resolving on every call

05

Call Flow & Etiquette

Call structure, holding, call-backs and positive language

06

Complaint Handling

Staying calm, assessing the problem, and resolving it with the customer

06

HOW PEOPLE LEARN ON THE DAY

Eight ways the day keeps people doing, not just listening

OPENING REFLECTION

A short personal-reflection activity opens the day, so people are talking before the content starts.

"A Little About You" — six prompts, each person picks one.

PRE- AND POST-ASSESSMENT

The same short knowledge check, before and after, shows what was actually learned.

Built from the course's own objectives 1–6.

VIDEO CLIPS

Five short clips break up facilitator input, and show rather than tell what good listening looks like.

VISUAL MODELS

Diagrams carry the content that's hard to say in words: the cultural iceberg, the HEAR model, the SCORE roadmap, the call-tree map.

A SHORT KNOWLEDGE GAME

A light word-based exercise re-engages energy mid-morning, with no props or prep needed.

DISCUSSION & BRAINSTORM

Facilitator prompts turn each model into a conversation — "What's a response you give automatically, without thinking?"

ROLE-PLAY PRACTICE

SCORE, the hold protocol and positive-language swaps are rehearsed in pairs, not just explained.

SIMULATED CALL

A complaint call and a six-branch call-tree scenario are rehearsed live before the day ends.

The point is repetition through different channels — hearing it, seeing it, saying it, doing it — not a claim that any one person only learns one way.

07

THE ONE-DAY AGENDA

Seven hours — one of them a break

09:00	*20′*	*Welcome, icebreaker and pre-assessment*
09:20	45′	Module 01 · The Customer Experience
10:05	60′	Module 02 · Mindset and Attitude — group activity
11:05	45′	Module 03 · Communication Skills
11:50	*60′*	*Lunch break*
12:50	75′	Module 04 · The SCORE Method — paired role-play
14:05	45′	Module 05 · Call Flow and Etiquette — role-play
14:50	60′	Module 06 · Complaint Handling — simulated call + call-tree
15:50	10′	Post-assessment, reaction survey, close

Start time and group size to be confirmed; module timings flex around them. Training time: 6 hours net.

ROOM & SETUP

A room (or call) that lets pairs role-play without disturbing each other, plus a screen for the five video clips.

GROUP SIZE

Built for a single intact team; role-play and the call-tree rehearsal work best under about 16 people.

TWO HALF-DAYS INSTEAD?

The same six modules can run as two 3.5-hour sessions on consecutive days.

08

MEASURING IMPACT

Kirkpatrick’s four levels, built in from the start

1

Reaction

Did people find the day useful, clear and relevant?

2

Learning

Can they recall and explain what the objectives asked for?

3

Behavior

Are they using SCORE and de-escalation on real calls?

4

Results

Is NPS improving, and are service-related churn reasons dropping?

Each level has a named instrument behind it, not just an intention to “follow up later”. They’re listed on the next page.

WHY NOT JUST ONE LEVEL?

A good Reaction score only tells you people enjoyed the day. A good Learning score only tells you they could answer questions afterwards. Behavior and Results are what show it changed how calls actually go — and those take longer to appear, which is why Level 3 is checked twice.

09

MEASURING IMPACT

Our evaluation toolkit

01

LEVEL 1 · REACTION

Participant Reaction Survey

A short survey at the end of the day covering clarity, relevance, pace and facilitator effectiveness.

End of the training day.

02

LEVEL 2 · LEARNING

Pre- and Post-Training Assessment

The same knowledge check, before and after, built from objectives 1–6.

Start and end of the day.

03

LEVEL 3 · BEHAVIOR

Scenario-Based Skills Assessment

Observers score a sample of real or simulated calls against a checklist drawn from SCORE, holding, etiquette and complaints.

Shortly after training, and again a few weeks later.

04

LEVEL 4 · RESULTS

Behavior & KPI Tracking

NPS and churn-reason data tracked against the pre-training baseline over agreed periods.

Agreed reporting periods.

Mastery criteria (Level 2), the observation scale (Level 3) and the Level 4 reporting cadence are agreed with you before the day, using your own baseline where it exists.

A LEVEL 2 ITEM LOOKS LIKE THIS

"State the formula used to calculate Net Promoter Score." — scored right or wrong, built from objective 4.

A LEVEL 3 CHECKLIST LINE LOOKS LIKE THIS

"Uses a 'Say this' alternative instead of 'We can't do that'." — scored as observed or not observed on the call.

10

WHAT CHANGES AFTERWARD

What you can expect to see

More consistent calls

Every agent works from the same five-step method and call structure — not individual habits.

Fewer unnecessary escalations

Agents who can de-escalate calmly, and know when to involve a manager instead of guessing.

A measurable before/after

Assessment and observation scores give you a number to report, not “the session went well”.

A line to business metrics

NPS and churn-reason tracking connect the day to the metrics leadership already watches.

These are the outcomes the design supports — the size of the change depends on your team’s starting point, and how consistently the skills get reinforced after the day.

WHAT ONE DAY CAN’T DO ON ITS OWN

A single training day won’t fix a broken escalation process, an understaffed floor, or a policy agents disagree with — those are management decisions, not skills gaps. If Level 3 observation shows the skills aren’t being used, that’s worth investigating alongside the training, not instead of it.

11

DELIVERABLES

What you receive, and what we need from you

YOU RECEIVE

- A full day of facilitator-led training, deck and speaker notes included
- A digital participant handout, in English and Arabic
- Pre- and post-training assessment, plus the reaction survey
- The scenario-based skills assessment checklist, ready for your observers
- A short results summary after each measurement point

WE NEED FROM YOU

- Group size, date and venue (or video platform)
- Access to a sample of calls or recordings for Level 3
- Current NPS and churn-reason data, if available, as a baseline
- Someone to observe calls for Level 3, or agreement that we do it

Let’s put a date on the calendar.

Confirm your group size and a preferred date, and we’ll schedule the day, prepare the handout, and lock the baseline measurements before it begins.
